Summary

Cloud engineer with 6 years of experience designing, deploying, and managing infrastructure on AWS and GCP. Passionate about autom

Experience

Full Stack Java Developer | POF , Pakistan

june 2024 – december 2024

- Architected and maintained multi-account AWS infrastructure serving 200+ microservices across 3 regions
- Built Terraform modules for standardized VPC, ECS, and RDS deployments, reducing provisioning time by 70%
- Implemented AWS Config rules and custom Lambda-based compliance checks for CIS Benchmark controls
- Designed IAM role strategy with cross-account access using external IDs for secure multi-tenant operations
- Led migration from EC2-based workloads to ECS Fargate, cutting compute costs by 40%
- Set up centralized logging with CloudWatch, OpenSearch, and custom alerting via SNS and PagerDuty
- Mentored 3 junior engineers on AWS best practices and infrastructure as code patterns

Projects

Officium Dashboard

An office automation system built with Spring MVC and PostgreSQL, focusing on high-performance database integration and optimized UI/UX for administrative efficiency

GitHub Analytics Platform

A data-driven tool that consumes GitHub APIs to visualize repository trends, contributor impact, and coding patterns using Python and interactive dashboards.

Loan Prediction Model

A machine learning pipeline that predicts loan eligibility by analyzing historical financial data and applicant profiles using Scikit-Learn.

Image Classification for Healthcare

A Deep Learning project using Convolutional Neural Networks (CNNs) to detect anomalies in medical X-rays or MRI scans.

Sentiment Analysis Dashboard

A Natural Language Processing (NLP) tool that scrapes Twitter or Reddit data to analyze public sentiment on specific brands using Transformers (BERT).

Real-time Chatting App

A high-concurrency messaging platform using Python, FastAPI, and WebSockets to support multi-room and private bidirectional communication.

Online Job Portal

A full-stack Java application facilitating job discovery, resume management, and employer-candidate matching through an intuitive user interface.

Technical Skills

Cloud Platforms: AWS (EC2, ECS, Lambda, S3, RDS, IAM, VPC, CloudWatch, Config, GuardDuty), GCP (GKE, Cloud SQL, Cloud Storage)

Infrastructure as Code: Terraform, CloudFormation, Ansible, Pulumi

Programming: Python, Go, Bash

Containers & Orchestration: Docker, ECS, EKS, GKE, Kubernetes

CI/CD: GitLab CI, GitHub Actions, Jenkins, ArgoCD

Monitoring: Prometheus, Grafana, CloudWatch, OpenSearch, Datadog

Databases: PostgreSQL, MySQL, DynamoDB, Redis

Security: IAM policies, Security Groups, NACLs, AWS Config, GuardDuty, Security Hub

OS: Linux (Ubuntu, CentOS, Amazon Linux)

Certifications

- IBM Data Science Professional Certificate (Coursera)
- Google Data Analytics Professional Certificate (Coursera/Grow with Google)
- HarvardX Data Science Professional Certificate (edX)

Education

B.S Computer Science | UET Taxila, Pakistan

2020 – 2024

Masters Data Science | Fulda University of Applied Sciences, Germany

2025 - present

Languages

- English (Fluent)
- German (A2)
- Urdu (Native)

Research and Publications

- Analyzing Digital Sovereignty Requirements in European SMEs considering OpenStack
